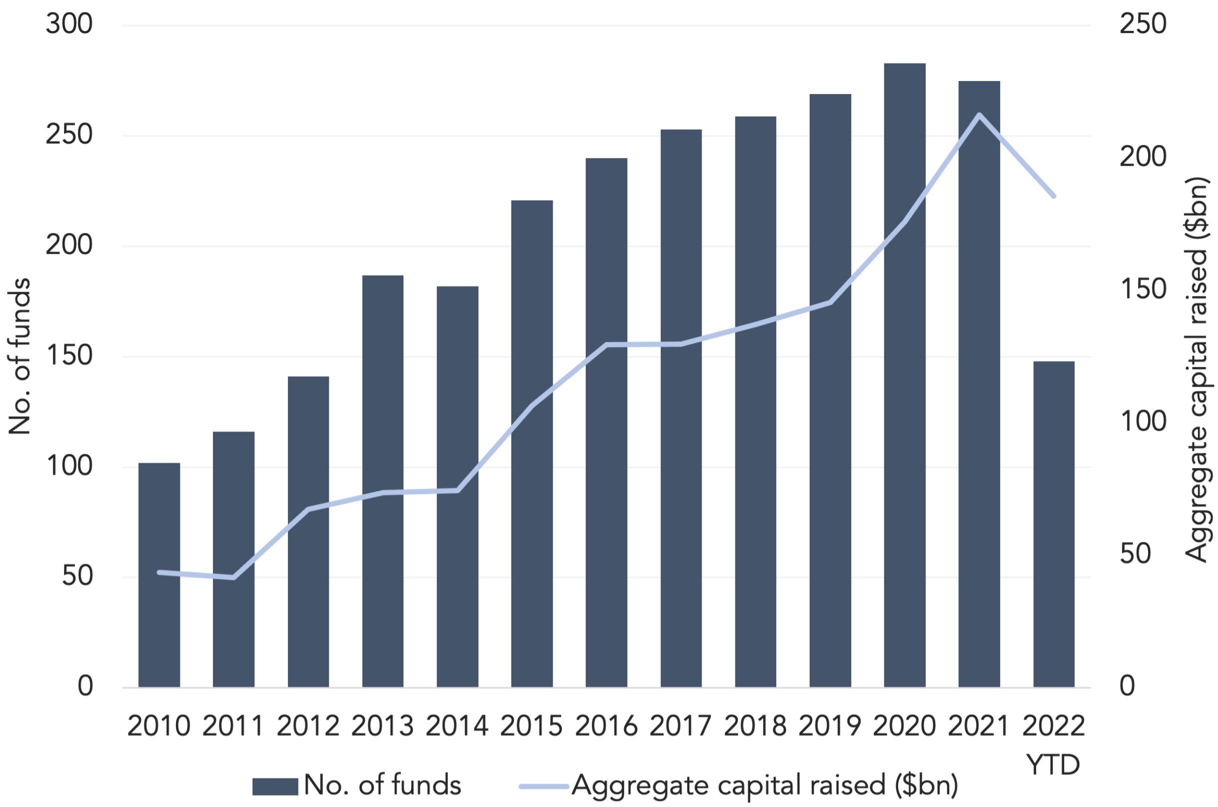
Private debt funds continue to grow

Chart



Download Data

[wpdm_package id='61190?]

Private debt is increasingly attractive to LPs amid global inflation and rising interest rates. Year to date, the average size of private debt funds closed has increased to a record $1.3bn, almost double that of 2020's $704mn. Aggregate capital raised by private debt funds experienced a 14% dip this year compared to 2021, as 31 fewer funds closed. Mega funds have formed a large part of the global aggregate capital raised, including the $15bn GS

Mezzanine Partners VIII, and the $14bn Clearlake Capital Partners VII, both of which lend to small and medium sized companies in the US.
